## Experience

### iWorQ Systems Inc

Software Developer, Logan, UT

09/2025 - Present

- Developed and refactored core features across a large-scale municipal platform, driving the ongoing transition of legacy PHP code to an MVCS architecture while taking lead ownership of specific application modules.
- Served as a major contributor on a new Laravel-based CMS site builder, collaborating within a specialized team to architect and implement core features, alongside maintaining public-facing Laravel portals and forms.
- Partnered with Product, QA, and Support teams to scope requirements, resolve escalated bugs, and ensure robust testing, while leveraging AI development tools to optimize workflow efficiency and accelerate rapid problem-solving.

### DAKCS Software Systems and PDCflow

Software Support Specialist, Ogden, UT

06/2023 - 09/2025

- Resolved an average of 30+ weekly software support tickets by diagnosing issues with C#, IMS BASIC, and Python, analyzing database inconsistencies using SQL, and promoting solutions using object-oriented programming.
- Improved team efficiency by authoring comprehensive documentation on troubleshooting common software issues.
- Enhanced customer satisfaction by leading remote training sessions for new and existing users on software features and best practices.

---

## Education

### Computer Science

Utah State University

05/2024

- Graduated with Bachelor's Degree—3.9+ GPA
- Relevant Courses: Web Development, Advanced Algorithms, Mobile Application Development, Decision Making Under Uncertainty, Software Engineering, Programming Languages, Advanced Databases, Data Science
